20 YEARS OF RCDXC AND FPTP

It was now 20 years ago that 4 guys (Jan Tunér, Sweden, Ullmar Qvick, Sweden, Rainer Stall, Sweden, Stig Adolfsson, Sweden - all Sweden. Hi!!) got together and started the RCDXC. The first bulletins were both in English and Swedish. And believe it or not the membership fee was 3 Swedish Crowns. They also published an Address Guide which was obtainable for 0.75 Swedish Crowns. Incredible!!!

It can be noted that the only member who was in the gang at the start and still is a member is OM Johnny Karlsson. Congratulations to You OM. To give You an idea of what they were up to at that time, here are some logs found in "Tune in with Jan Tunér":

Dominican Republic: Dominico Telec. Corp., Ciudad Trujillo hrd on 9445-HI4I w tfc.

Hawaii: RCA Kahuku hrd on KUH29-19840 all afternoon.

New Guinea: Hollandia hrd on JZC48-18975 to the Netherlands with a 20kW SSB transmitter.

Fiji: C&W Suva hrd on 19800 around midnight.

Jamaica: C&W Stony Hill, near Kingston hrd on 13520

Windward Islands: C&W Grenada hrd on ZBF24-5868 at 1000-1800

Well everybody that was a little of what could be heard at that time.

OK now we are definately off for 100 years of RCDXC.....

ST_BARTHELEMY (by OM GBj)

The French defence forces are building a radiostation under Fort Oscar which is located on the peninsula southwest of Gustavia. The station will be able to communicate with all french forces around the world via satellite. The whole station will be placed below ground level and the remains of the old fort will be restored after the completion of the station.

- - - - -
 French Army (by om AM)

The present position seems to be that the callsign allocations now are FLR, FAB, FAC, FAD and FAQ (in fact FA series). The fei, FOX and other FC call signs, previously used for local networks, appear to have been phased out and re-allocated to the FA regional nets.

- - - - -
 Aero Bangkok (by OM MvA)

Received a letter for HSD Aero Bangkok from Amorn Songsomboon, Meteorological Department. The letter was accompanied by 2 nude photos!!! and an invitation to come to Bangkok. For those interested the address is 612, Sukumvit Road, Bangkok 11, Thailand Hi!!!! My letter was forwarded by the Meteo Department to the Aeronautical Radio of Thailand, Soi Suan Ploa Toeng, Nahamek, Bangkok. Nothing received from them though. (Use the address published in FPTP 4/81 instead,ed)

- - - - -
 US Coast Guard Saipan (by OM SD)

The Lorain station on Saipan Island has been closed down according to a letter from US Coast Guard Marcus Islands. Too bad we lost a good station that could be heard almost daily here in Sweden.

- - - - -
 ADDRESSES

To AEMLAGG: US Army MARS station, 141st Signal Battalino, APO NY 09326, USA

To AEMLEO: US Army MARS radiostation, Army Depot Building 124, D-6300 Giessen, FRG

- - - - -

That was all for this section for now. Please look in QSLs and letters for shorties I am sure you have a lot of interesting short articles to write

OM CBj on vacation in Thailand (Koh Samui Island - Gulf of Siam) sends us the following contributions regarding point-to-point activity in Thailand.

- 000 -

When arriving to Bangkok he visited Aeronautical Radio of Thailand Ltd and the manager for aeronautical telecommunications, Mr Prasidh Klinklao who gave him the following information:

"Aeronautical Fixed Services are part of our activities and we provide HF radio communications with stations in Hong Kong, Dacca, Singapore, Rangoon, Vientiane and Hochimin. Most circuits are in ISB mode i.e. we put RTT/TSK on one sideband and A3/Telephone on other sideband. The circuit with Dacca is still operated in plain F1 but we will soon divert into ISB. Our communications with Hong Kong and Singapore will as soon as possible be converted to cable and/or satellite."

Some "years ago" they had a 300W F1 circuit with Amsterdam !!!!

Frequencies used by Rangoon: 2510, 3290, 5188, 7813 & 10581.5.

Frequencies used by Vientiane: 5937, 7873 & 6970 (only daytime).

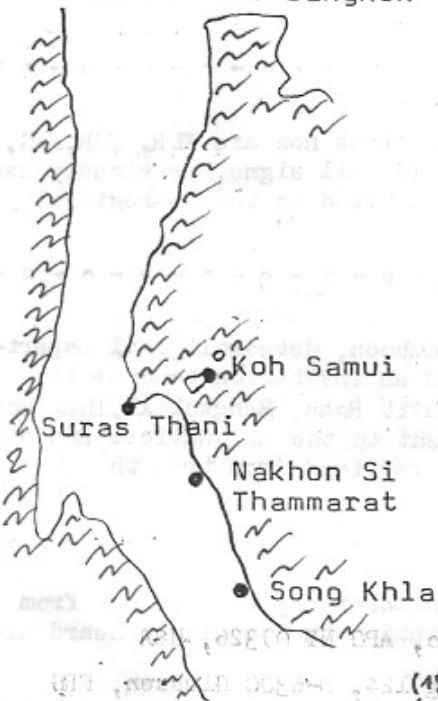

Underlined frequencies most used !!

Frequencies listed for Aerothai are correct. There is presently no communications with Manila and Phnom Penh. The AX circuits from Hong Kong are nowadays operated via Cable & Wireless - in a recent report from ITU all frequencies listed by Civil Aviation Deptm have been deleted. This is confirmed by OM AD who reports Hong Kong on ZEO70-14952.5 with aeronautical traffic with Bangkok.

Hochimin and Singapore have both been reported in A3 to Bangkok in recent issues of Fptp i.e. Singapore on 13896.5 from midnight when Bangkok returns on 11428 kHz - A3 on LSB.

- 000 -

● Bangkok

When staying on the island of Koh Samui OMj found navigational system similar to LORAN operated by Union OIL Co.

Stations participating were Song Khla (master), Koh Samui (north slave) and Nakhon Si Thammarat (south slave). Sometimes also communications with the HQ in Bangkok.

Frequencies 3785.5 and 8319 SSB. Transmitter power about 100W and antennas are dipoles.

The station on Koh Samui consist of two tents, one for the radiostation and one for generator and batteries. The "LORAN" antenna is a 30m vertical.

- 000 -

There is also a HF station operated by the PTT Telecommunications Authority of Thailand" on the island.

Call-sign is HSM5 (Koh Samui) and they work with Bangkok on 6885, 6785 and 5435. (A1).
(1930Z) at 1130 local time and with Suras Thani at
(1930Z) 1230 local time.

Also using voice (USB) on 7915 and 5770 between 1000 - 1130 local time with Suras Thani and Bangkok. (1700-1930Z)

Transmitters were "home brewed" - receivers Hammarlund HQ180A for A1 and Racal RA87D for A3.

CBj

=====

Frequencies are exact when underlined or preceded by a call-sign. Times are always given in GMT. Ø in a call-sign means the figure Zero and 0 in a call-sign means the letter Oscar.

 ANTARCTIC SURVEY - ANTARCTIC SURVEY - ANTARCTIC SURVEY - ANTARCTIC SURVEY

Winter in the Northern Hemisphere means summer in the Southern Hemisphere and increased activity in Antarctica. Another factor making radiostations in Antarctica easy to hear could be favourable propagation conditions as a result of long dark winterdays. This edition of Eftp reports several stations from Antarctica in the "Tune A3" section and there are many more to hear. As a guide when listening to these stations we have tried to put the information we have together in a what we hope helpful tool.

On previous page we have a map over the Antarctic region showing bases active today. A symbol with adjacent figure indicates the presence of an research expedition. The figure can be found in the summary below i.e. it is a reference figure when looking for the name / location of a certain expedition.

OM's .. more next time please

+++++
FEES FEES FEES FEES FEES FEES FEES FEES FEES FEES FEES FEES FEES FEES FEES FEES FEES FEES FE
+++++

As the fee for RCDMC membership has been kept at the same level for almost 10 years now it is time for a small raise to meet the rising costs for postage etc... But to simplify the matter of the fees we have decided to have only one fee for everybody. This leads to a situation when a few members will have to pay a little less than before.

The fee for 1982 will be 25 Swedish crowns (= 15 IRC=10 German Marks=12 Dutch Guilders= 5 US Dollars=1000 Japanese Yen etc).

The fee can be paid directly to the club if bank notes or IRC:s are used. If you want to use a Postal Giro transaction please send the money to: Stellan Dahlin, Torsgatan 25, S-113 21 Stockholm, Sweden and the account number is 78 48 63-3.

ONCE AGAIN WE HAVE COME TO THE END OF A FTIP YEAR SO WE WANT TO WISH YOU ALL A

!!!!!!!!!!!! MERRY CHRISTMAS AND A HAPPY NEW YEAR!!!!!!!!!!!!

We also hope all of you get receivers, antennas and all the other equipment you want and need from FATHER CHRISTMAS so we get an even better FTIP in 1982.

We also want to thank all the members for your active part in getting this bulletin as good as it is. And maybe the new year holiday can give you a few moments to tune in to new interesting station so you can send us a lot of news for the next bulletin. Don't forget the deadline below.
